

Master of Engineering: Engineering Management

Grow and accelerate your career opportunities as a proven engineering leader and manager with this high-impact, proven alternative to a traditional MBA for engineers.

What You Learn

- Confidently, competently lead engineering teams and projects to well-planned and -executed success
- Improve your ability to understand how your daily work and engineering decisions affect the financial bottom line of your employer
- Improve your ability to knowledgeably manage engineering-related legal, marketing, and HR issues
- Be the engineering leader who can communicate and advocate for successful results with stakeholders and decision-makers
- Immediately apply what you are learning to real projects and needs in your workplace

Where & How You Learn

Where Online; Fall, Spring, and Summer term admissions.

How Ideally, you will take three credits each summer and six credits each fall and spring over two years.

Classes meet online once a week; each class is available at more than one time and is recorded, so you can participate regardless of your travel schedule or location.

You have an opportunity to meet and learn with faculty and fellow students at an optional, on-campus, residency each summer.

You develop close, supportive relationships with fellow professionals as you progress together through the core curriculum.

“With the Wisconsin MEM degree, I get the best of both worlds – a good grounding in business disciplines built on the foundation of engineering principles that I appreciate so much – and at a school with a sterling reputation for excellence.

Vera Martinovich, Engineering Manager, Boeing

	EPD 618	Applied Leadership and Management of Engineering Organizations	3

Listed courses and schedule are subject to change

Most Master of Engineering Management students complete the program in two years. Students who need or want to complete the program over a longer period have the option of selecting a three- or four-year plan.

Each summer, we offer an optional one-day, on-campus residency for you to meet faculty and fellow students to build connections that will benefit you throughout your time in the degree program and beyond. Our graduates have consistently rated the residency as a high-impact experience, and have found that the professional relationships they begin there carry through their careers.

Proven, career accelerating curriculum
More impact than an MBA for most engineers

The Right, Proven Mix of Structure and Flexibility to Support Your Success

The Masters of Engineering Management courses follow a consistent rhythm to help you work with your busy schedule. Readings and recordings are assigned at the beginning of the week, and you can choose between two web conferences that best fit your busy schedule. Throughout the week you will participate in online discussions, work on individual homework, and work collaboratively with your team on projects. Every Sunday, the week's homework is due.
